

REMARKS

Claims 29-63 are pending in the application with claims 29, 34, 39, 44-50, 54 and 59 being independent. Claims 29-32, 34-37, 39-42 and 44-49 have been amended and new claims 50-63 have been added. Claims 29, 34, 39 and 44-49 have been amended to recite a single pixel instead of a plurality of pixels, and for clarity. Claims 30-32, 35-37 and 40-42 have been amended for consistency with the claims from which they depend.

New independent claims 50, 54 and 59 are similar in scope, respectively, to claims 29, 34 and 39, and further recite a capacitor formed between the gate electrode and the source region of the first transistor. An example of such a capacitor is the capacitor 105 of Fig. 2. No new matter has been introduced.

Claims 29-49 have been rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 11-21, 23-25, 27 and 28 of U.S. Patent No. 6,661,180. Applicant requests withdrawal of this rejection in view of the terminal disclaimer that is being filed with this reply.

Applicant submits that all claims are now in condition for allowance.

Enclosed is a \$1610.00 check for excess claim fees (\$1300), the terminal disclaimer submission fee (\$130) and the information disclosure statement fee (\$180). Please apply any other charges or credits to deposit account 06-1050.

Respectfully submitted,

Date: January 5, 2005
